## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 9-15 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9-10 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,126,247 to Palmer et al.

Recitations of intended use fail to impart patentability to an old composition. Broadest reasonable interpretation of the term "kit" found in the claims is "a set of articles used for a particular purpose." Per Example 7 at col. 35, a set of components used for colorimetric measurement of serum cholesterol includes a tetrazolium salt (specifically MTT), an emulsifying agent (Triton X-100) and a buffer (potassium phosphate buffer). Therefore, this disclosure is deemed to anticipate the cited claims.

4. Claims 9-10 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 418113 to Organics Ltd.

Recitations of intended use fail to impart patentability to an old composition. Broadest reasonable interpretation of the term "kit" found in the claims is "a set of articles used for a particular purpose." Per page 3 beginning at line 14, a set of components used for detecting antibacterial components includes a culture medium and a tetrazolium salt (specifically MTT). Therefore, this disclosure is deemed to anticipate the cited claims.

5. Claims 9-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Abe et al.

Recitations of intended use fail to impart patentability to an old composition. Broadest reasonable interpretation of the term "kit" found in the claims is "a set of articles used for a particular purpose." Per the disclosure of the reference, a set of components used for evaluating the inhibitory effects of amyloid beta protein on succinate dehydrogenase includes a culture medium for rat cortical astrocytes, nitropropionic acid and a tetrazolium salt (specifically MTT). Therefore, this disclosure is deemed to anticipate the cited claims.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
